theshowerlab

intro

theshowerlab™

theshowerlab™ is the UK's number one source for the most desirable Frameless shower screens available in the market today.

Focused on the highest quality showering solutions, theshowerlab™ manufacture the widest selection of products which include;

- Frameless Shower Panels and Walk-In Enclosures
- Frameless Shower Enclosures,
- Frameless Corner Enclosures
- Frameless Three Sided Enclosures
- Frameless Bath Screens
- Solid Surface Shower Trays

theshowerlab™ is known and respected for our BESPOKE, MADE TO MEASURE SHOWER SCREENS, providing tailor made Frameless shower screens to customer's particular requirements.

To better respond to customer demand for STANDARD products in fixed sizes for immediate delivery, theshowerlab™ also offer an impressive selection of shower screens from stock, all of which are backed by our Lifetime Guarantee.

Glass

In line with our continued promise to provide only the best quality products, our Frameless shower screens are offered in luxury 10mm safety glass, all with 'Easy Clean' protective glass finish included as standard with, no extra charge.

With seven different options available including Clear, Ultra-Clear (Low-Iron), Satin Etched, Blue Bronze, Green and Grey Tinted, you can have fun with the design of your Frameless shower screen, choosing a design that reflects your individual taste.

Finishes

As well as offering all our Frameless shower screens with components to match Chrome, theshowerlab™ offers a choice of five alternative finishes throughout the range of both our STANDARD and BESPOKE, MADE TO MEASURE shower screens. Select from Black, White, Gold, Brushed and Polished Nickel.

Choice

Providing versatility and individuality, both our STANDARD and BESPOKE, MADE TO MEASURE HINGED DOORS are manufactured with a choice of eight handles designs.

With such a plethora of choice, you can ensure an aesthetic that reflects your own personal style, down to the very last detail.

PROJECTS

theshowerlab™ frameless shower screens have been used by architects, interior designers and discerning individuals in some of the finest bathrooms around the world.

VERTICAL HANDLES

Providing versatility and individuality, both our **STANDARD** and **BESPOKE, MADE TO MEASURE HINGED DOORS** are supplied with a choice of eight handles (H4, H5 and H7 **NOT AVAILABLE** with **STANDARD SLIDING DOORS**, Tarim 30, Indus 31 and Arum 32).

With such a plethora of choice, you can ensure an aesthetic that reflects your own personal style, down to the very last detail. All handles are included in the price shown.

H1. DIA 20mm x D 63mm x H 152mm

H2. DIA 20mm x D 63mm x H 152mm

H3. DIA 20mm x D 63mm x H 230mm

H4. DIA 20mm x D 63mm x H 475mm
(Not available with **Standard** Tarim 30, Indus 31 and Arum 32)

H5. DIA 20mm x D 63mm x H 475mm
(Not available with **Standard** Tarim 30, Indus 31 and Arum 32)

H7. DIA 32mm x D 30mm
(Not available with **Standard** Tarim 30, Indus 31 and Arum 32)

H8. DIA 50mm

H9. W 40mm x H 80mm

HORIZONTAL HANDLES

For both our **STANDARD** and **BESPOKE**, **MADE TO MEASURE HINGED DOORS**, handles H4 and H5 can be fitted horizontally as required (subject to confirmation at time of ordering). H4 and H5 **NOT AVAILABLE** with **ANY SLIDING DOORS.**

H4. DIA 20mm x D 63mm x L 475mm

H5. DIA 20mm x D 63mm x L 475mm

TOWEL RAIL HANDLES

For both our **STANDARD** and **BESPOKE, MADE TO MEASURE HINGED DOORS**, H12, and H13 can be fitted horizontally as required (subject to confirmation at time of ordering) and used as a towel rail to the outside of the screen with either one plate and a knob to the inside so the handle can be used to open/close the door. Both handles are included in the price shown. H12 and H13 **NOT AVAILABLE** with **ANY SLIDING DOORS.**

H12. DIA 20mm x D 63mm x L 475mm

H13. DIA 20mm x D 63mm x L 475mm

GLASS OPTIONS

With seven different options available you can have fun with the design of your shower screen, choosing a design that reflects your individual taste.

EASY CLEAN GLASS FINISH

Under a microscope, the surface of clean glass is a mass of pits and craters to which dirt will cling and water will hold as it drains slowly away. The ‘Easy Clean Glass Finish’ is an application that makes the glass water repellent by bonding an invisible non-stick polymer coating to the glass, creating an impenetrable barrier against limescale and other kinds of build up.

All shower screens are supplied with this fantastic finish to help you make light work of keeping it looking just like new.*

*Care must be taken when cleaning glass protected with ‘Easy Clean Glass Finish’. All abrasive cleaning products must be avoided as they will destroy the polymer coating which in turn will reduce the effectiveness of the application.

AFTER CARE

Easy Clean Refurbishment Kit - If the effectiveness of the Easy Clean glass finish is reduced due to over aggressive cleaning with abrasive materials, the finish can be refurbished using this three part kit. £45

UV bonded glass pelmet – used in place of a metal stay bar to stabilise a shower screen

UV BONDING

For the ultimate in ‘frameless’ appearance, fixed glass panels can be joined by a specialist process called ‘UV bonding’ which eliminates the need for metal brackets. This process is carried out in situ by trained installers using specialist equipment working to exacting standards. Please contact us for more details.

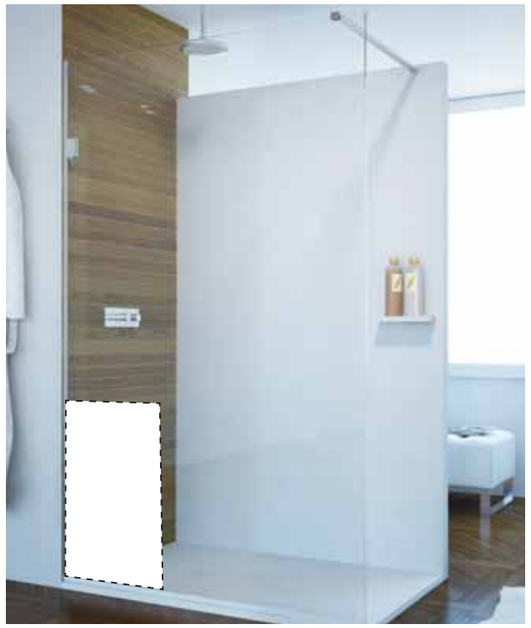
UV Bonding

Glass to Glass Brackets

RAKES, CUT ANGLES & NOTCHES

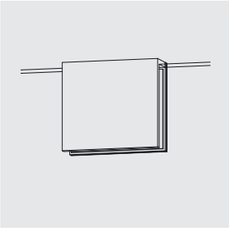
Rakes - Bespoke, Made to Measure only.
If required, glass can be cut for walls and floors that are out of square. Price shown includes 1 rake per piece of glass.
Additional rakes add £120 per rake.

Cut Angles - Bespoke, Made to Measure only.
If required, glass can be cut to suit a sloped ceiling.
Add £120 per cut angle.

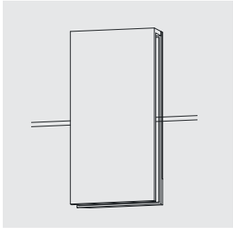


Notches - Bespoke, Made to Measure only.
If required, glass can be cut for a square or rectangle. Price shown includes 1 notch per piece of glass. Additional notches add £120 per notch.

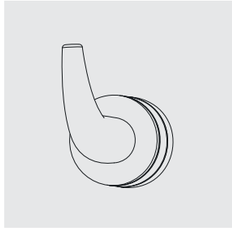
EXTRAS – FOR BESPOKE, MADE TO MEASURE SIZES



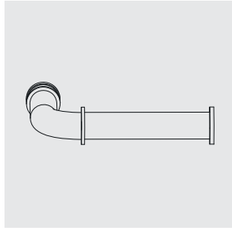
Ceiling Bracket CB1. For use with fixed panels fitted floor to ceiling. The bracket allows for a gap of 4-14 mm between the glass and the ceiling.
Chrome £48
Black/White £50
Polished Nickel £60
Brushed Nickel £60
Gold £65



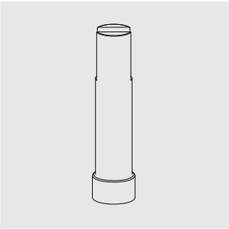
Ceiling Bracket CB2. For use with fixed panels fitted floor to ceiling. The bracket allows for a gap of 4-65 mm between the glass and the ceiling.
Chrome £53
Black/White £55
Polished Nickel £65
Brushed Nickel £65
Gold £70



Robe Hook - We can supply a Robe Hook which fits through a pre-drilled hole in the glass.
Chrome £60
Black/White £80
Polished Nickel £85
Brushed Nickel £85
Gold £100



WC Roll Holder - We can supply a WC Roll Holder which fits through a pre-drilled hole in the glass.
Chrome £145
Black/White £155
Polished Nickel £165
Brushed Nickel £165
Gold £185



Neon 01 Floor Support - For use with fixed panels where a gap is required. The support allows for a gap of 120 mm between the glass and the floor.

IMPORTANT INFORMATION

We are a dedicated manufacturer whose sole business activity is the design, development and production of an inspiring collection of showering products.

SHOWER SCREENS

All products are manufactured in accordance with EN 14428 and feature only 10mm thick toughened safety glass to EN 12150, all treated with Easy Clean protective finish at no additional charge.

Aluminium sections are extruded to BS 1474 from alloys complying with BS 6463 and coated to BS 6464.

All our frameless shower screens and walk-in shower enclosures are approved for use with “power showers”. It is unrealistic to expect any frameless shower screen to contain water if it is not used for the purpose for which it is intended, i.e. showering using either a fixed or adjustable showerhead. If you want to make a shower screen leak by forcing water at the seals, it will leak!

Water retention is maintained in all products under normal showering conditions. However, when planning the design of your shower, water retention is a key consideration and thought must be given to the following;

The position of your showerhead – to avoid the chance of water escaping, where possible, try not to have water aimed directly at the frameless shower screen. The positioning of all shower heads in this brochure is for illustrative purposes only.

Install your frameless shower screen in a well ventilated area as steam may result in a build-up of mineral deposits.

Walk-in frameless shower screens with no doors may allow water spray to pass beyond the length of the screen, dependent upon the position of the showerhead and the volume of water it delivers.

As spray/mist may escape from your frameless shower screen, it is advisable to have a suitable waterproof floor outside the showering area.

Product descriptions do not imply the use of precious or valuable materials and colours and finishes shown in the catalogue are as accurate as possible within the limits of the printing process.

We follow a policy of continuous improvement and product design and therefore reserve the right to change product specifications and prices without notice.

BATH SCREENS

Our range of bath screens are not designed to fit on baths with stepped fronts, an integral soap dish, head rest, handles that sit above the top of the bath or baths with a roll top design, all of which may affect the performance of the screen.

Our inward opening bath screens need room to move, so care must be given when positioning your taps of shower to ensure sufficient space is left to fold the screen flat against the wall.

Our bath screens are suitable for standard pressure showers and are not recommended for use with “power showers”. We recommend that the shower head is positioned parallel to the bath screen and does not aim water directly at the screen.

CLEANING AND CARE INFORMATION

To maintain the appearance of your products clean by using a soft damp cloth and dry with a soft dry cloth or chamois leather. For stubborn stains, use undiluted washing up liquid.

Do not use abrasive or acidic cleaning products, scouring agents, products containing alcohol, scouring pads or steel wool. Lime scale can be avoided by wiping away drops of water immediately after use.

Easy Clean Glass Finish is an application that makes the glass water repellent by bonding an invisible non-stick polymer coating to the glass, creating an impenetrable barrier against lime-scale and other kind of build-up.

Shower screens are supplied with this finish to help you make light work of keeping it looking just like new. Care must be taken when cleaning glass protected with Easy Clean Glass Finish.

All abrasive cleaning products must be avoided as they will destroy the polymer coating which in turn will reduce the

effectiveness of the application.

HOW SHOULD YOU PREPARE THE AREA WHERE YOUR SHOWER SCREEN IS TO BE INSTALLED?

Please show this information to your installer before they commence any work.

Your screen will be hand-made, specifically for you and as such; care should be taken when preparing the area where the shower screen is to be installed. The following points should be observed:

Ideally the base (shower tray, tiled floor etc.) should be horizontal over the whole length. If the base is out of level the screen may be difficult to install. Ideally, all walls should be upright, level and plumb. If the walls are not upright, level and plumb the screen may be difficult to install.

Please note, if your shower screen is being installed directly onto a tiled floor, it is important that you consider any items below the tiles (i.e. under-floor heating, pipe work etc.) that could be damaged when the horizontal under-frame/channels are being installed.

Your shower screen is manufactured using 10mm thick toughened safety glass that is heavy. It is important that all walls (and where appropriate ceilings) are suitably prepared so that the installer can achieve a suitable secure fixing (for hinges, channel, stay bars etc.) during installation.

If the wall is a stud wall (as opposed to a solid wall), timber supports should be located behind the fixing points. The minimum specification of these timbers is either 300mm x 300m x 25mm squares where the hinges or stay bars are fixed directly to the wall (the exact location of these is governed by the overall height of your shower screen or 100mm x 50mm x required length where glazing channels are fixed directly to the wall (and ceiling where panels are being installed full height). Please speak with your appointed bathroom retailer for more information.

Your dimensions should be taken to finished works. This means that the shower tray or tiled floor is installed and your walls are fully tiled before measuring.

If you require any channels to be installed before you tile (so that you can tile up to them to conceal them) all sub surfaces should again be fully prepared.

You should consider the position of any items that you intend to position after the installation of your shower screen that may affect the future operation of your shower screen (i.e. wall mounted towel radiators, WC’s, basins etc.) as well as the position of the showerhead. It is not best practice to aim water directly at an opening door as, depending on the pressure and volume of water, the shower screen may not contain all the water.

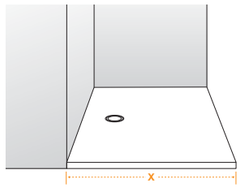
If in any doubt, why not let our team of experts take care of everything? Please contact us for details of our full surveying and installation service.

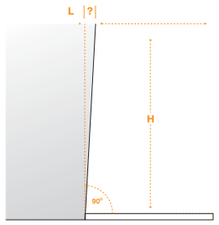
theshowerlab™

MEASURING GUIDE

Important – always measure to finished walls after tiling.
All dimensions to be provided in millimetres.

FIXED PANELS





Measure the width at the base.

Base Dimension X = mm

Measure the height required. (Our standard height is 2000mm, but your screen can be manufactured to be taller or shorter as required).

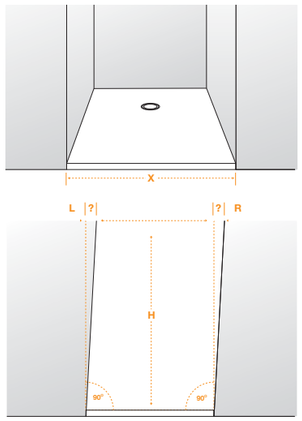
Height H = mm

If your walls are not 100% square we need to know. Please provide the following information:

H – Height of Screen = mm
L – Left Hand Wall Leans = mm In/Out
R – Right Hand Wall Leans = mm In/Out

Wall leans In/Out – please delete as appropriate.

ENCLOSURES



Measure the width of the opening at the base.

Base Dimension X = mm

Measure the height required. (Our standard height is 2000mm but your screen can be manufactured to be taller or shorter as required).

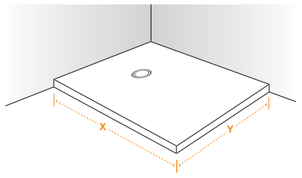
Height H = mm

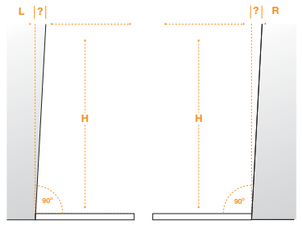
If your walls are not 100% square we need to know. Please provide the following information:

H – Height of Screen = mm
L – Left Hand Wall Leans = mm In/Out
R – Right Hand Wall Leans = mm In/Out

Wall leans In/Out – please delete as appropriate.

CORNER ENCLOSURES





Shower screens are normally positioned 10mm back from the outside edge of the tray but this may vary depending on the specification of your tray.

Dimensions provided must be to the outside of the shower screen.

Measure the width at the base.

Base Dimension X = mm
Base Dimension Y = mm

Measure the height required. (Our standard height is 2000mm but your screen can be manufactured to be taller or shorter as required).

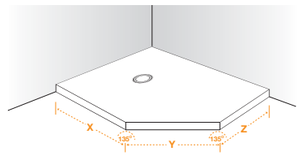
Height H = mm

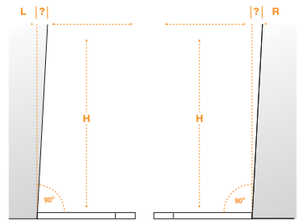
If your walls are not 100% square we need to know. Please provide the following information:

H – Height of Screen = mm
L – Left Hand Wall Leans = mm In/Out
R – Right Hand Wall Leans = mm In/Out

Wall leans In/Out – please delete as appropriate.

NEO ANGLE ENCLOSURES





Shower screens are normally positioned 10mm back from the outside edge of the tray but this may vary depending on the specification of your tray.

Dimensions provided must be to the outside of the shower screen.

Measure the width at the base.

Base Dimensions X = mm
Base Dimensions Y = mm
Base Dimensions Z = mm

Measure the height required. (Our standard height is 2000mm but your screen can be manufactured to be taller or shorter as required).

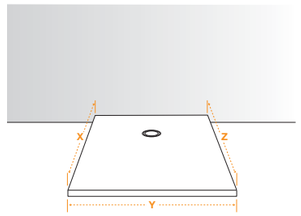
Height H = mm

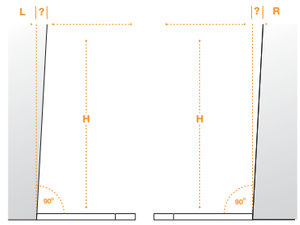
If your walls are not 100% square we need to know. Please provide the following information:

H – Height of Screen = mm
L – Left Hand Wall Leans = mm In/Out
R – Right Hand Wall Leans = mm In/Out

Wall leans In/Out – please delete as appropriate.

THREE SIDED ENCLOSURES





Shower screens are normally positioned 10mm back from the outside edge of the tray but this may vary depending on the specification of your tray.

Dimensions provided must be to the outside of the shower screen.

Measure the width at the base.

Base Dimensions X = mm
Base Dimensions Y = mm
Base Dimensions Z = mm

Measure the height required. (Our standard height is 2000mm but your screen can be manufactured to be taller or shorter as required).

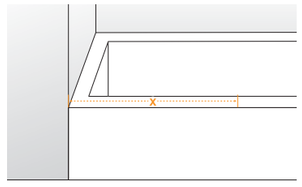
Height H = mm

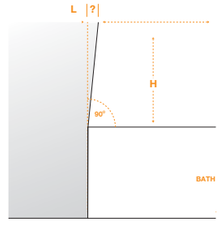
If your walls are not 100% square we need to know. Please provide the following information:

H – Height of Screen = mm
L – Left Hand Wall Leans = mm In/Out
R – Right Hand Wall Leans = mm In/Out

Wall leans In/Out – please delete as appropriate.

BATH SCREENS





Measure the width at the base.

Base Dimension X = mm

Measure the height required. (Our standard height is 1500mm but your screen can be manufactured to be taller or shorter as required).

Height H = mm

If your walls are not 100% square we need to know. Please provide the following information:

H – Height of Screen = mm
L – Left Hand Wall Leans = mm In/Out
R – Right Hand Wall Leans = mm In/Out

Wall leans In/Out – please delete as appropriate.

scene® MATERIA

Scene is an advanced composition of mineral compounds, organic polymers and specific additives which are designed to be moulded. It is also known as synthetic stone and is included in a group of “Solid Surface” materials; Skinless synthetic materials whose outermost surfaces have the same properties as their interiors.

The synthetic resin component in its structure gives it a certain amount of elasticity, while the mineral compounds act as a kind of shield that provide resistance to wear and tear, and also give it anti-slip qualities.

marmek®

A compact and mineral composition of resins which are derived from marble. This gives the product its hardness and very good properties for use in the bathroom. The finish gives endless possibilities to personalise the product (1625 colours) and offers excellent resistance to maintenance and body care products. The material in itself has high anti-bacterial qualities and is highly suited to shower tray with its natural anti-slip properties.

NEON
SHOWER TRAYS

marmek®

HEIGHT

25 mm

40 mm

35 mm

For shower trays with additional side borders

INSTALLATION

Onto paving / tilling

Built in

GRID | DRAINAGE

Includes round stainless steel grid.
Optional same colour shower tray circular grid

Optional same colour shower tray or stainless steel square grid

Includes Ø90 waste trap (UNE EN-274)
Possible to install with different Ø90 waste traps

SURFACE FINISH

Slate texture finish

Smooth texture finish

Antislip standard
type 3 ENV 12633

OPTIONAL EXTERNAL BORDER

Possibility to choose sides desired for border

SMOOTH & SLATE TEXTURE

LIFETIME GUARANTEE

We are so confident that theshowerlab™ shower screens will meet all your expectations that we offer a full Lifetime Guarantee.

This guarantee is in addition to and does not affect your statutory rights.

All theshowerlab™ shower screens are guaranteed for life from the date of purchase against manufacturing defects for glass and components with the exception of plastic seals which are guaranteed for two years from the date of purchase.

The guarantee does not cover damage caused during installation or glass shattering during or after installation. Easy Clean protective finish is not guaranteed for life as its performance is subject to outside influences, i.e. the maintenance and care regime of the user and is subject to a reduction in its effectiveness if abrasive cleaning products are used.

The guarantee is only valid in the UK and is available to the original purchaser (proof of purchase will be required) and cannot be transferred to a third party.

If a product is deemed to be defective, we will repair or replace any part of the item originally purchased. This shall constitute our sole obligation covered by the guarantee.

The guarantee covers normal domestic use, for all theshowerlab™ screens that have been installed in accordance with our installation instructions.

Under no circumstances will we be liable for:

- Any item that has been modified without prior written approval by us.
- Any item that has been subjected to accidental damage, normal wear and tear, wilful neglect or that has failed as a direct result of incorrect maintenance.
- Any compensation, payments for consequential losses or any other associated costs unless prior written consent is given by us.

Appropriate care must be taken when cleaning glass that has been treated with the Easy Clean Glass Finish as the use of abrasive cleaners may damage the specialist surface protection.

We reserve the right to change designs, product specification, finishes and materials without prior notice in line with our policy of continual review and improvement.
