Water and wellness in its beginnings

The first person to understand the potential of water was the Greek philosopher Thales who saw water as a primordial element, the origin of all things. But it was the Romans who first put into practice the benefits that water gave to the body and mind and who introduced bathing as a refined daily activity. Numerous thermal spas were built throughout the empire, offering wellness enhanced by marble and mosaics. The Middle Ages was a dark period in which the pursuit of wellness was considered a sin, but between 1700 and 1800 hydrotherapy stations began to flourish again, places in which the bourgeois nobility spent their free time. Water became synonymous with health and the most diverse practices were created to deliver a range of targeted benefits, from thalassotherapy based on the use of sea salt, to the alternating of hot and cold water. The turning point was at the end of the 19th Century in Germany with the industrial production of enamelled cast iron bathtubs which was followed by the evolution that led to baths with integrated hydrotherapy systems, patented by Jacuzzi®.

To create is to dream.
This is how Jacuzzi® was born.

Each of us has a dream. The history of Jacuzzi® began here. From the creativity, the energy, the ability to anticipate what people's dreams will be. And then, make them come true. Over a century ago, Francesco, Rachele and Valeriano Jacuzzi, left Italy to seek their fortune, and headed for California. Within a few years, Gelindo, Candido, Giocondo and Giuseppe had joined them to found Jacuzzi Bros. The year was 1915 and a story that was out of the ordinary was beginning to take shape, the result of ability and resourcefulness, ingenuity and innovative spirit.

The first invention was a new concept for propeller design adopted by the United States Air Force, prologue of the first enclosed cabin monoplane patented in 1920. From here, a series of insights would open up new perspectives. From the invention of an irrigation pump that was a huge success with American farmers, to the creation of the Frostifugo, a high powered fan that blew warm air over crops to combat frost.

Each idea led to another idea. Until 1956, when Candido made a virtue of necessity. In order to relieve the pain from the severe rheumatoid arthritis of his youngest child, he created the first submersible pump for the bathtub. The J-300® was born, a jet pump that synthesizes the curative effects of hydrotherapy.

1968 was the year of change. Candido's design was reworked by his nephew Roy, who designed a bath with integrated jets and a hydromassage system. The basis of every Jacuzzi® model.

From this point the story tells of evolution and steady growth aimed at wellness for people. A model that has overcome geographical boundaries, but remains firmly anchored to the roots and the innovative spirit that still remains the most important asset of the Jacuzzi® brand with its more than 250 international patents, it is an example of excellence in the development of technologically advanced products with unique design.

10 reasons to choose Jacuzzi®

1. More than 50 years experience

Jacuzzi® has been producing hydromassage baths and showers since the 60s. It was the Jacuzzi brothers who designed and launched the first whirlpool bath. Since then, Jacuzzi® technicians have patented hundreds of designs and innovative products.

2. Hydromassage carried out to perfection

Jacuzzi® hydromassage is unique: the careful work that combines technology, ergonomics and design, produces a beneficial effect that is still unmatched. The positioning of the nozzles at 30°, with jets that can be positioned in any direction, allows all the muscle groups to feel the deep, effective and healthy hydromassage.

3. A unique construction system

Superior in terms of sturdiness, thanks to a structure reinforced with a robust metal frame, Jacuzzi® baths have the ideal inner depth and are equipped with a hydraulic self-draining system. The combination of the dry run protection system, high powered pump and self closing jets are but a few of the features that make our baths the best.

4. A name you can trust

Jacuzzi® is the name of a brand, but you must have heard a whirlpool bath referred to with this name. It's common to associate the term "whirlpool bath" to the name of our brand because in the minds of the consumers we are the only ones who exist.

5. Wellness for the whole family

Enjoying quality time and taking care of yourself is among the main benefits. Immersing yourself in a Jacuzzi® bath, taking a break in a shower cubicle with hydromassage and steam bath, away from the pressures of everyday life is good for your health and wellbeing. Regular use leads to better circulation by increasing the blood flow in any part of the body and can be essential for maintaining a healthy lifestyle for all the members of your household.

6. Jacuzzi® Design

Jacuzzi® has always been a pioneer in aesthetics: we design and develop our products working with the greatest Italian and international designers. This means that the best in domestic hydromassage technology produces its highly effective results in models with modern design.

7. Jacuzzi® products durability

Looking inside a Jacuzzi® whirlpool Bath is like taking a look under the bonnet of a luxury car. The Jacuzzi® manufacturing components are without doubt the best on the market. We do not compromise when it comes to quality. All our Jacuzzi® products are made to order to the highest possible standard to create a luxury bathing experience.

8. Energy savings

Jacuzzi® baths employ innovative and cutting edge insulation technologies and components, the best on the market. These help to maintain internal heat more efficiently, significantly reducing energy expenditure. In addition, each whirlpool bath is equipped with low energy consumption recirculation pumps.

9. The best partners

To achieve maximum quality Jacuzzi® has the best suppliers. It is also a leader as a result of choosing the best partnerships in all the areas related to the creation of its products for hydrotherapy.

10. We're here for you

After entering the showroom, looking at the choice of Jacuzzi® baths or showers, through to installation and 10 or 20 years later, our customers will know that they have chosen the best. You can rest assured that we are here through our aftersales team including our own engineers to provide the support you would expect from a Jacuzzi® product.

Jacuzzi®, much more than just a name

design: essential element of refined aesthetics and maximum functionality.

health: reflects the attention to the health of body and soul.

Life flows like water, the priority of Jacuzzi® is to restore rhythm and balance. A demanding job, playing sports or just a busy life, create the constant need for a revitalising, rewarding, relaxing and rejuvenating ritual. For over 50 years we have worked with this awareness, with the aim of creating new technologies that can make the Jacuzzi® whirlpool experience unforgettable.

Something to experience with the body and the senses, inspired by the benefits to the body and mind in their broadest sense. As a result, today the name Jacuzzi® is associated with four values that represent the four basic levels of wellness. Every Jacuzzi® product is based on these values, in a synthesis capable of improving the lives of its customers.

performance: generated from technological research that provides the best results.

pleasure: represents the enjoyment and the pleasure of being satisfied with life.

The scientific basis behind Jacuzzi® wellness

Everyone today talks about the whirlpool bath, most have one at home, but in the market and in the world of hydromassage advertising, information is virtually absent on the proper use and the possible therapeutic benefits, as well as the reasons that lead hydromassage products being linked to the concept of wellness. Jacuzzi® wants to promote a culture of hydromassage, sauna and steam room. For this reason an in-depth and focused medical study has been carried out, which Jacuzzi® has turned into a project on communication and scientific discovery entitled “The new form of wellness”.

The new form of wellness

The book on hydrotherapy in general and in particular on hydromassage published by Jacuzzi®, was produced under the supervision of Prof. Umberto Solimene, Chairman of the Association and the Head of the Department of Medical Therapy and Spa Medicine at the University of Milan and Prof. Arsenio Veicsteinas, Deputy Chairman of the European Association of Medical Welfare and Dean of the Faculty of Human Movement Science at the University of Milan, its contents coincide with the guiding principles of Jacuzzi® scientific and technological research and underpin the development of all its products. We present a summary as an introduction to the world of Jacuzzi® hydromassage.

Hydrotherapy

Hydrotherapy uses water to completely or partially heat or refresh the body. Water, at certain temperatures, in the form of steam or under the pressure of a jet, can relieve muscle tension produced by stress and anxiety. Hot water is used in physical therapy to accelerate muscle recovery after injuries and relieve pain. The targeted jets of water (such as those caused by Jacuzzi® nozzles inclined at 30°) generate a deep massage through relaxing micro-bubbles and offer different types of hydrotherapy massage to improve circulation and promote the release of endorphins.

Hydromassage

Created from the combination of water, heat and air. The water reduces the weight of the body mass by 90%, loosening the tension of muscles and joints. The heat dilates blood vessels improving the flow of blood. The air released from the jets as well as relaxing the muscles relieves nervous pressure. Hydromassage can be done with thermal waters, but not necessarily: the principle of action, in fact, does not rely so much on the quality of the water, as its temperature and its movement. Its aim is to awaken the natural self-healing mechanisms of the body. In fact, the thermal stimulus is the main factor of hydrotherapy: a first reaction, which occurs at the skin level, is followed by a second that reaches the internal bodily tissues, connected to the surface through the nerve pathways. Acting on the local concentration of blood, it is possible to put the body area to be treated into a state of equilibrium.

Steam and shower room

The steam room consists of a bath of dry steam in an environment saturated with hot air at 40-50° with humidity of up to 100%. The steam can also be combined with chromotherapy and aromatherapy. There are numerous benefits, including improved blood and lymphatic circulation, it favours oxygenation and purification through the elimination of toxins and helps respiratory, liver, kidney and intestine functions work at their best. A shower is conducive to a good mood thanks to its invigorating antidepressant effect. It is useful in the treatment of skin imperfections such as cellulite because the water jet ensures nerve stimulation which affects the tissue.

“The new form of wellness”, the Jacuzzi® book available on request.

whirlpool bath

Hydromassage: domestic hydrotherapy

How it works

Hydromassage is a form of “external crenotherapy”. It is carried out with special jets of water issued at certain pressures. The jets are oriented in a centripetal direction, i.e. from the sole of the foot to the chest, to facilitate the circulation of the blood. This centrality of the water jets in therapeutic terms explains why their orientation is one of the key factors to the Jacuzzi® hydromassage. In fact, hydromassage baths are designed with particular

The temperature

Water is considered hot if it is above the body temperature (37°C); at 40°C it is very hot and over 46°C it can not be endured for more than a few seconds. A hot hydromassage is exhilarating at first, but can become very “stressful” for the body. Therefore, it is essential to control the temperature of the water in relation to the duration of the bath. As a general rule: the higher the water temperature, the shorter the hydromassage should be, as suggested by the table.

To accustom the body you could start with 10 minutes until you reach the optimal duration, which should be tailored to the individual. Before the hydromassage, at least once a month, it is advisable to scrub the body to free the skin from dead cells.

Table of temperature/hydromassage duration

34° - 36°: 20 minutes

36° - 38°: 15 minutes

38° - 40°: 10 minutes

attention to the positioning of the jets, which should not be placed randomly but specifically considered together with the internal ergonomics of the bath, to maximise the effects of the hydrotherapy. The design of the bath, a key element of a good hydromassage, is also the result of careful research. Jacuzzi® baths are deeper than traditional baths, with ergonomic bottoms and sides that better accommodate all body shapes and allow proper immersion of the body and better water circulation. Jacuzzi® hydromassage is based on the physical principle of the Venturi effect, which materializes a perfect mixing of air and water. For hydromassage to be done properly, the jets must have an important characteristic: to be inclined at 30° to allow for a proper massage active from the surface to the core and to be adjustable in any direction, to ensure maximum personalisation.

The authentic Jacuzzi® hydromassage has jets inclined at 30°, which can be positioned in any direction.

Who can benefit

The therapeutic properties of the hot water in the hydromassage bath tubs are suitable for every body type, size and level of stress. Some need a powerful jet to loosen the knots of the muscle mass. Others simply require a cradle of warm soothing water. But the beneficial effects of hydrotherapy can do more: it is argued that it manages to relieve the symptoms of arthritis, while providing temporary relief from chronic pain and promoting relaxation.

When precautions are necessary with hydromassage

As with all types of true hydrotherapy products, caution must be used in cases of serious illness or the acute phase of disease. It is not recommended in cases of acute and chronic respiratory failure and also with some skin disorders. Finally, in terms of cardiac circulation, it is better not to have a hydromassage if you are undergoing cardiac treatment. In any event, it is always advisable to consult your doctor.

Jacuzzi® jets give a powerful and targeted massage

The seven golden rules when choosing a good whirlpool bath

1. Location and type of hydromassage jets
2. Flow regulation
3. Directionality of jets
4. Uniform water/air mix
5. Internal ergonomics of the bath
6. Ideal temperature
7. The experience and reliability of the manufacturer

Inspired by you and targeted where it matters most. The Jacuzzi® jets are the result of 50 years of research and innovations: in synergy with the powerful hydromassage pump, releasing a mixture of air and water which is highly effective on the vital points of the body. Inclined at 30° and adjustable in any direction, they hit all the muscle groups of the body in the correct direction. The plantar and lateral jets stimulate the whole body, eliminating fatigue and tension, while the rotating dorsal microjets massage the entire back.

SHOULDERS

The build-up of tension in your shoulders, often leave you feeling discomfort and muscle stiffness. The Jacuzzi® jets installed at the upper part of the baths and shower columns, work specifically on these muscles, relaxing them, and releasing fatigue and tension.

BACK

Sitting in the same position for a long time at work, carrying loads, fatigue or walking too much, can create back pains which can be strong and accumulate stress that also affects posture. The lumbar jets and in particular those that are inspired by shiatsu massage apply a constant and continuous pressure in this very important area of the body, relaxing, toning and relieving pain.

LUMBAR

All the pressure, which is sometimes unbearable, accumulating on a daily basis in the lower part of the pelvis is alleviated and released in the water thanks to the action of a single large jet positioned in the centre of the Jacuzzi® hydromassage bath, providing immediate relief and rest.

HIPS - THIGHS - KNEES

This area of the body is very important for circulation. Often with our posture, the fact of working sat down for long periods, slows the circulation, creating tension and swelling. Jacuzzi® has positioned the jets at just the right height to stimulate the circulation of blood and relieve discomfort.

LEGS - FEET

It is difficult to imagine the levels of stress, load and tension our feet, ankles and calves are subjected to every day. Every step, every flight of stairs, all the loads we carry, put pressure on this area of our body. Moreover, the soles of the feet are connected, by extension, to the entire body. The two Jacuzzi® jets positioned at the height of the feet, not only restore strength and relieve fatigue, but reactivate the blood flow and stimulate a beneficial flow of energy throughout the body.

Choose your Jacuzzi® whirlpool bath

CLASSIC JACUZZI® MASSAGE

Original patented wellness. The timeless Jacuzzi® whirlpool technology, with jets inclined at 30° and adjustable in any direction, which massage the entire back and the lateral and feet jets, which stimulate and tone the entire body including the legs, down to the soles of the feet. A progressively intense action, in a centripetal direction, which involves all the muscle groups, releasing, energising and finally relaxing the body.

AQUASYSTEM

The soul is included in the hydromassage. Thanks to exclusive Jacuzzi® technology, the hydromassage has levels of customisation never seen before: just the gentle touch of a finger will activate the preferred program. SILENCE, relaxation is complete, the muscles release all the tension, in a delicate, gentle and silent way. BREATH, hydromassage at a slow and harmonious pace which puts you in sync with your breathing, for unimaginable, deep psychological wellness. RENEW, to renew the vital tone, reinvigorate your body, clear your thoughts, drive away stiffness: this is the hydromassage that varies intensity in a gradual sequence to provide toning and relaxation. DREAM, an extraordinary mix of gentleness and toning, in a dream sequence which in a gradual and cyclical way changes from a light caress of water to a beneficial embrace.

SHIATSU

Hydromassage on the meridians of the body.

An exclusive hydromassage system, patented by Jacuzzi®, provided with two parallel rows of 32 jets, placed just in correspondence of the “vu” meridian which, according to Chinese medicine, sends energy from the back to the whole body. The microjets of water are orientated to hit and activate all the dorsal and lumbar points, with the same gradual pressure as the fingers of a masseur. The pressure is governed by a complex electro-hydraulic system that produces a real flow of water, even a progressive “rolling” of pressures: which is exactly what happens with Shiatsu. The treatment can be performed in two ways: from the bottom upwards (toning) and from top downwards (relaxing).

Additions to wellness

REMOTE CONTROL

With just the click of a button. The remote control for the Jacuzzi® whirlpool bath is a sophisticated electronics management centre, which works in a simple and intuitive way. Result of the most advanced Jacuzzi® technology, it is possible to turn on the bath at a distance, prepare the hydromassage, choose programs, methods and intensity, include or exclude the jets.

LIGHTING - CROMODREAM®

The eye also wants its share of wellness. Our senses are not only physical, but also emotional. The Jacuzzi® lighting systems make the hydromassage moment more emotional, especially in the dark, illuminating the water. The Cromodream® function, together with the hydromassage, provides an authentic chromotherapy session in accordance with the mood and the need of the moment, for total wellness that involves the body, the senses and the mind.

HEATER

Like the spa. The time and the quality of every experience in your whirlpool bath can be enhanced by choosing our heating system. Thanks to the heater, available as an upgrade or standard depending on the model, this option keeps water temperature constant for the entire duration of the bath, recreating the true feeling of the spa.

SWITCH

Control of the jets is in your hands. This is what really makes the Jacuzzi® hydromassage unique. With our hydromassage system there is nothing standard: every body is different, as such the needs and conditions are different. Jacuzzi® allows you to decide which part of your body you want massaged more or less intensely, which jets to activate, which muscle groups to focus on, passing easily from one group of jets to the other.

HEADREST

Head and neck, the focus of wellness. Jacuzzi® comfort for all the senses and taking into account every detail. Even the position of the neck is important to enjoy a perfect hydromassage session. The head must be perfectly relaxed: this is why Technogel® or EVA headrests are the ideal solution. This soft, foam-like, antibacterial material is a luxury must-have for total wellness.

COLOURS

The nuances of design. Even the colour becomes an element to personalise your Jacuzzi® bath, matching the bathroom, the interior decoration and your personal taste.

TOP

Elegance, the centre of attention. The sophistication and refinement of the Jacuzzi® design is also found in the details and can be harmonised with any environment. The ergonomic shape of the baths are enhanced by the possibility of luxurious customisations with the highest quality materials. It is possible to choose from Teak or Wengé wood, white Carrara marble or absolute black granite, Piasentina stone and the exclusive and prestigious Corian®, in which an attractive luminous frame can be inserted.

PANELS

Prestigious materials. Jacuzzi® comfort for all the senses and taking into account every detail. The whirlpool baths are beautiful and elegant and, depending on the model, the freestanding versions are finished with the highest quality, durable and non-deformable panelling made from exclusive materials: acrylic, Techstone®, Corian®, wood.

The unique nature of the Jacuzzi® design

Automatic draining system

The hydromassage system of the Jacuzzi® whirlpool bath has an inclination designed to prevent the stagnation of water, in order to maintain optimal hygiene.

The jets and the power

The pump drives the hydromassage system and must have sufficient power to ensure continuous water circulation in an energetic and controlled way. This is why the Jacuzzi® jets are so powerful and beneficial.

Reinforced structure

The shell of Jacuzzi® bath is protected by a uniform layer of fibreglass, applied over the entire surface. The bottom is further reinforced by a wood panel that is 2 cm thick, firmly anchored in a sturdy metal frame.

Sanitising system

Included or an optional system with electronic controls integrated into the control panel. To activate it, press the appropriate button for 4 seconds, a precautionary measure to prevent accidental starting of the sanitisation cycle. The process takes 10 minutes, is fully automatic and uses a liquid disinfectant. A series of LEDs indicate proper operation and give a signal when it is finished.

Dry Run Protection

A special device that protects the hydromassage system prevents the pump from operating when the bath is empty or has an insufficient water level. An additional guarantee of durability and reliability for Jacuzzi® whirlpool baths.

Ideal depth

The internal depth of the bath is essential to ensure the proper execution of the hydromassage, which is why Jacuzzi® baths, thanks to clever ergonomics, have the ideal depth to immerse the body completely without using excessive amounts of water.

Exclusivity and refinement for wellness

Unique solutions and exquisite materials: Aura offers, in an exceptional frame, the maximum in Jacuzzi® wellness. The seat is equipped with the classic Jacuzzi® hydromassage including lumbar hydromassage. Its adjustable jets invigorate, revitalise, releasing tensions, promoting circulation.

Complete personalisation

This is a bath with an original look, which is versatile and eclectic, fitting perfectly into any environment thanks to different versions and the possibility to choose the finish of the edge: Wengé, Teak, White Carrara marble, Black granite and Piasentina stone.

Absolute comfort

The headrest made of EVA, a soft, non-toxic and antibacterial material, with its original design is studied to fully accommodate the neck, even in “total immersion”, ensuring maximum comfort and stimulating the vital areas of the neck and shoulders. Everything in Aura is elegant, the draining is hidden under the rim, the hand shower is retractable and the electronic control panel manages all the functions.

Immerse yourself in light

The underwater lighting creates an exciting atmosphere and an intimate and reinvigorating experience. The heater keeps the water temperature constant, ensuring maximum comfort. The exclusive system of Jacuzzi® sanitation, included in the top versions, allows correct and constant water hygiene.

aura corian®

aura corner 160 corian®
aura plus corian®
aura corner 140 corian®
aura uno corian®

A unique material

Corian® is a material patented by DuPont with extraordinary aesthetic characteristics. Resistant to light, heat, water and any other pressures, it remains unchanged over time and combines extraordinary hardness, similar to stone, with great flexibility and versatility of design.

All the characteristics of Aura

Every detail of Aura Corian is carefully considered: from the original design of the headrest, to the draining command hidden under the rim, to the electronic control panel that manages all the functions. The chrome-plated tap unit is complete with retractable hand shower. The handy diverter allows you to choose the action of the nozzles for the classic hydromassage or the dorsal hydromassage with three rotating nozzles. The underwater light creates a spectacular effect during the hydromassage and the remote control allows you to access all the functions easily and immediately.

Prestige to any room

The Corian gives a special feeling to the unmistakable volumes of Aura. Its translucency brings out the edge of the bath and thanks to the spectacular LED floor lights, it creates a very exciting suspended effect, especially in the dark.

The maximum in Jacuzzi® wellness.

The seat is also equipped with lumbar hydromassage. Its directable jets invigorate, revitalise, releasing tensions and contractures, promoting circulation, while the underwater lighting creates an exciting atmosphere.

j-sha

j-sha mi

Balance and energy

The Chinese discovered that the vital energy or Qi flows along channels called meridians. Shiatsu is a special massage that stimulates the meridians with pressure of the fingers, releasing fatigue and relieving pain according to the principles of acupuncture. Based on this holistic view of wellness Jacuzzi® has created J-Sha.

The first and only Shiatsu hydromassage in water

The unique J-Sha hydromassage system has a parallel row of 32 nozzles placed along your back in correspondence with the “vu” meridian. Coming out of these in succession are microjets of water orientated so as to reach all of the dorsal and lumbar points of the meridian, with the same gradual pressure as the fingers of a masseur. The pressure is governed by a complex electro-hydraulic system that produces a real flow of water, working as a progressive “rolling” of pressures: which is exactly what happens with Shiatsu.

A tailored treatment

The deep ergonomics of J-sha enables everyone to find their ideal position, sliding forward or backward. The water level is always perfectly maintained thanks to a sophisticated hydraulic system and in this way it is always possible to perform the shiatsu massage properly. J-sha allows you to choose from 3 pre-set programs: BACK/JET (shiatsu), BODY/JET (classic hydromassage) and MIX (mixed). The treatment can be performed in two ways: from the bottom upwards (toning) and from top downwards (relaxing). These programs are further customized by manually using the controls on the electronic panel at the side of the bath.

A beautiful experience in every sense

The underwater light helps to make the environment more harmonious, giving the emotion of light to the shiatsu hydromassage moment. By simply using the remote control it is possible to activate all the J-sha functions: hydromassage, radio, underwater lighting.

opalia

opalia
opalia wood/stone

The softness of design

This is a line of whirlpool baths that tells a unique story, both in terms of its style and its technology. Every detail of the Opalia range is refined, the finish is exquisite, the hydromassage comes from the powerful Jacuzzi® jets positioned to envelop the whole body in a beneficial embrace.

A visual experience too

During the hydromassage, the water is illuminated! The underwater light, provided as standard with the Wood and Stone versions, makes the relaxation more complete and the self-care more emotional. The sanitisation system comes as standard so as to provide the security of complete hygiene.

Functionality and technology at your fingertips

The electronic control panel gives you control over the hydromassage programs in a simple and intuitive way. The dual ergonomic headrest blends in with the aesthetics of Opalia and offers optimal comfort. It comes as standard with the Wood and Stone versions.

The aesthetic comes as standard

The brassware unit matches the aesthetic line of Opalia, as well as the finishing of the edge, customisable in Teak, Wengé, White Carrara marble, Black granite and Piasentina stone.

Contemporary simplicity

The Jacuzzi® Sharp line eliminates the superfluous to favour function and ergonomics, it recovers the most from the interior space for maximum comfort and with its simple and squared shapes fits perfectly into any environment.

Hydromassage and character

Sharp is available with classic Jacuzzi® hydromassage and in the Top versions, with Aquasystem® technology, to wrap the body in the embrace of an effective and deep hydromassage, offering maximum wellness. The linear and minimalist shapes, the clean design, the long seating in the Double and Extra versions, are the stars of this line with innovative aesthetics.

Electronics and multi-sensory experience

The control panel that operates all the Sharp functions pays attention to every detail from the ergonomic Technogel headrest, to the refinement of the underwater light, and the heater (Classic and Top AQS).

Wellness in various dimensions

Sharp exists in different versions and different models to meet all your needs. The simple squared lines, the three types of panels in different finishes, for the free-standing versions, are the product of an absolute synthesis of the form.

Revive the body and spirit

The essence of the Aquasoul family is to offer an experience of complete renewal, relaxation and rejuvenation. The heart of Aquasoul is an exclusive technology that allows you to customise the hydromassage as you want, in every detail, depending on the mood of the moment.

Only the people who invented the hydromassage could reinvent it

Aquasystem® is the new Jacuzzi® revolution: with a simple press of a button on the remote control, you can choose from four types of wellness – Silence, Breath, Renew, Dream – in tune with your mood, according to the needs of every single moment.

Accommodating the body completely

By precisely studying the ergonomics and internal depth, Aquasoul baths allow you to immerse yourself in the water up to your shoulders, optimising the effects of the Jacuzzi® hydromassage. Every detail is taken care of and the exquisite materials, such as the technogel® headrest, a material that is very soft, are welcoming and comfortable, with antibacterial properties.

The perfect marriage of aesthetics and functionality

In addition to offering total relaxation and comfort beyond imagination, all the Aquasoul models have luxurious details, refined lines and rounded shapes. Operation and the choice of functions are immediate, performed by the elegant electronic remote control which is activated with the touch of a finger. Particularly striking is the effect created by the Led floor lighting: the bath seems to rise from the ground, magically as if suspended over the light.

Classic design and balance of shapes and volumes

Elegant synthesis of unique design and technology for the Jacuzzi® hydromassage, the baths from the Classic line offer top performance and unique aesthetics.

A classic for wellness

All equipped with the classic Jacuzzi® hydromassage, the Classic baths offer a targeted and deep treatment that involves all the muscles of the body. A complete hydromassage to enjoy in total relaxation thanks to the comfort of the ergonomic headrest.

The secret is in the jets

In all the models, the jets are located in the dorsal, lumbar and side area in order to cover, with their powerful jets, the shoulders, spine, back, loins and also the full length of the legs, for a total benefit.

Electronics made easy

Thanks to the electronic control panel, all the functions of the Classic baths can be activated with a simple and intuitive touch with the finger.

conforto 170

We've taken as our point of departure a bath shape designed specifically to offer the most comfortable bathing position to any size and shape of body and then we've put this into a multitude of shapes and sizes. The angle of the back rest and its shaping are the foundation of the ultimate in bathing comfort, offering neck, shoulder and lumbar support.

The combination of the bathing position and the multi-patented Jacuzzi® Jet which remains unchanged in its engineering and positioning are at the heart of Conforto. The rest of the system is brimming with ways to customise your experience, from the strength of the massage, the number of jets and their positioning to the colours in the Chromotherapy option. You will find the formula to satisfy your needs, whether this is for relaxation, rejuvenation or recovery.

energy

energy 180
energy 170

Hydromassage is for everyone!

Energy is a small revolution in the world of domestic hydromassage. A new concept of bath from the balanced, essential, minimal and timeless forms which matches any type of furnishing and is accessible to everyone thanks to attractive prices, while maintaining the prestige and exclusivity that have made the Jacuzzi® brand famous worldwide.

A perfect synthesis of shape and functionality

Energy offers everyone the perfect experience of the authentic, deep, beneficial Jacuzzi® hydromassage for areas of the body, aimed at the back, legs and feet. The jets are adjustable through 15° to get the maximum benefit. The internal comfort is the result of clever ergonomics, the headrest is comfortable and welcoming.

Stylish details

The sensors of the touch controls, positioned on the edge of the bath, can be activated by touching the symbols, which can be identified by touch with closed eyes.

The light is included

Energy is fitted with a courtesy light and the pleasure of the Jacuzzi® experience can be completed with the Cromodream® option that allows you to enjoy, together with the hydromassage, an exciting session of chromotherapy. Due to the capacity and the depth of the bath the feeling of warmth and relaxation is total.

steam & shower cabins

The wellness comes from above

The shower for hydrotherapy

A world apart

A Jacuzzi® shower is an extraordinary experience because it offers a feast of water that is absorbing, regenerating, all-encompassing, and gives energy and emotions. It is an authentic Jacuzzi® wellness system dedicated to the body as a whole, both physical and emotional. In fact, the hydromassage Steam & Shower Cabins are a world apart: they combine the beneficial effects of hydrotherapy with the dynamism of modern life.

Feel good every day

The shower is the daily act par excellence: Jacuzzi® has made a ritual of wellness. Simply by touching the control panel, it is possible to open a world of functions, from the simple to the more technological, accompanying the body to discover excellent psycho-physical fitness.

Pleasure, innovation, prestige and intimacy

Entering a Jacuzzi® Steam & Shower Cabin is equivalent to choosing how you want to feel good every day. Are you looking for the vitality of a waterfall that tones the shoulders and chest? Or the regenerating warmth of a steam room with aromatherapy? Or a complete hydromassage with the Cromodream® system, which together with the benefits of the water, provides the body with real showers of colour.

Functionality and wellness

While conducting research for "A new form of wellness", produced under the supervision of Umberto Solimene and Arsenio Veicsteinas, collaborators at the European Association of Medical Welfare, it has been shown that the shower constitutes an external crenotherapy activity. Like other types of treatment it can be carried out at different temperatures, hot or cold, with alternating temperatures in sequence and different pressures of water. It can be total body, ensuring a stimulus to the body, or local, bringing direct effects to the treated area.

An undisputed fact is that the Steam & Shower Cabin has hydrotherapy functions, as such many physiological benefits are recognised. Its main action is directed at the cardiovascular and nervous system: the warm water jets directed to different parts of the body have important effects on wellness. It is now shown that, in addition to stimulating circulation and muscle function, the shower can also have beneficial effects on the internal organs.

Shower and hydromassage

Targeted and effective

The Jacuzzi® shower nozzles are the result of the most extensive hydromassage experience in the world and over 50 years of research and innovation. Positioned to generate different types of hydromassage, they hit all the muscle groups of the body in the correct direction. In this way they stimulate the body, eliminating fatigue and tension.

The Enerjet system by Jacuzzi®

Jacuzzi® has reinvented the hydromassage and adapted it for the shower. The technology for wellness knows no boundaries and the secret of vitality is contained in the latest generation of Enerjet water microjets: a source of energy and freshness that knows no comparison. They point directly at the areas of the body that need the greatest attention, are adjustable for water flow and pressure intensity, and can be directed as desired.

Scottish shower

Rapid alternation of warm and cold water, an ancient but sophisticated energising system, ideal for a stronger physical condition. An authentic blessing that revitalises the skin, tones the muscles and stimulates the immune system. It can also be activated with the hand shower function, vertical hydromassage and back hydromassage.

Vertical hydromassage

The true, invigorating concentration of energy available in 4 or 8 jets, regenerates the body's natural vitality. The build-up of tension in the shoulders and muscular rigidity disappears.

Back hydromassage

A massage with water fingers, a remedy for reinvigorating the dorsal area, and in particular the back, and providing harmony and deep relaxation.

Shiatsu hydromassage

Exclusive to Jacuzzi® which, thanks to jets that run along the back, operates a constant pressure in the vicinity of the meridians of the body, with a relaxing, toning, anti-pain effect.

Lumbar hydromassage

Ideal for toning hips and buttocks, a real blessing to keep your body at its best, thanks to the beneficial and vigorous jets specifically designed to alleviate the tension and fatigue of muscles located in the lumbar region.

The fourth dimension of wellness

The multifunctionality

The Jacuzzi® shower enclosure is not an alternative to the hydromassage bath, but a real way of thinking about daily wellness and enjoying an unparalleled experience. Just select on the simple and intuitive control panel the function you desire and activate it: the choice is extensive.

Vertical hydromassage

Jacuzzi® takes the benefits of an authentic and deep hydromassage to the shower enclosure. Simply choose from the control panel the intensity of the adjustable jets to target the more tense and tired muscles and add to the pleasure of the shower with the experience of complete wellness and rejuvenation.

Cascade shower

A really exciting way to shower, which gives complete, deep and lasting wellness as it exercises a pleasant massage on the shoulders. The fresh and vital action of the water, which flows in a continuous and voluminous stream, working on the muscles suffering from greatest stress, giving an unforgettable feeling of relaxation.

Steam bath and aromatherapy

A beneficial cloud of steam envelops the body from head to toe, deeply purifies the skin and helps the body to rid itself of toxins, strengthening the body's natural defences. The discovery of the benefits of the steam bath is ancient. Today, this particular form of hydrotherapy has assumed the value of an authentic wellness ritual. Inside the multifunction Steam & Shower Cabin, thanks to the fan fitted as standard, the steam bath has a constant temperature and humidity. The boiler is more powerful, thanks to the technology developed by Jacuzzi®, it is placed inside the walls and the delivery takes place through a nozzle located under the seat. In this way the steam rises naturally and uniformly upwards. Furthermore, thanks to a special fragrance diffuser, in which you can add essential oils, it is possible, during the steam bath, to perform an authentic aromatherapy treatment. Depending on the properties of the essences used, it is ideal to relax, rejuvenate, calm, restore respiratory function when it is congested or just be enveloped by your favoured essences.

Functions and emotions

Cromodream®

A completely new rain of stimuli and sensations, thanks to the exclusive Jacuzzi® patent, acts as a tonic to the mood and nervous system. Cromodream® is a flow of light and colour that surrounds the body together with the water of the shower or the steam from the steam bath. The result of Jacuzzi® research, aimed at the discovery of new frontiers of wellness, provides 4 programs to be chosen from based on the needs of the moment: Sun, Relax, Energy and Dream.

SUN

A sunny atmosphere, a combination of warm colours – yellow-orange-white – interspersed with sequences of blue and violet.

RELAX

To promote relaxation through the combination, in a soothing sequence, of the four colours: light blue-orange-blue-white.

ENERGY

Nothing is more vital than red and orange, alive and alight from the power of the white light they alternate with.

DREAM

To enjoy the full range of colours, from the warmest to the most stimulating tones. A kaleidoscope of white-blue-orange-yellow-green-magenta.

Crystal Clear by Jacuzzi®

The walls of the Steam & Shower Cabin, the transparent and glass surfaces, are pre-treated with Crystal Clear water-repellent and anti-lime scale finish. This system preserves the beauty of all the surfaces, making cleaning easy, and ensuring superb brightness over time.

Music System

Do you like singing under the shower or listening to the news, maybe the morning broadcast on your favourite radio station, or listening to music from your MP3? You can do whatever you want. Just activate the function that best fits the moment.

frame

frame IN2
frame 120
frame 100

The new frame of wellness

Minimalist lines and high levels of wellness for the Jacuzzi® Steam & Shower Cabin which is the perfect synthesis between functionality and aesthetics. Jacuzzi® technology is expressed in a contemporary design, the result is a new concept that frames the experience of wellness as a work of art. Available in sizes 100x75, 120x80 and now also in the double module: FRAME IN2.

Luxury fittings, minimal aesthetic

The clean lines characterise Frame which presents itself as a comfortable environment where you can experience all the functions dedicated to wellness: raindrop shower, shower with pulsed and sprayed water, energising cascade, shower in colours with preset Cromodream® cycles, steam bath and aromatherapy.

The first shiatsu hydromassage in a shower

With Frame, Jacuzzi® inserts for the first time in a Steam & Shower Cabin the shiatsu hydromassage function, together with the classic vertical, back and lumbar hydromassage. In this way the space dedicated to wellness becomes a small private temple: just touch the electronic control panel to activate a unique experience, adaptable to the needs of the moment: from the search for a moment of relaxation to a real and deep hydrotherapy session.

Enter into another dimension

Frame fits seamlessly into the surrounding space thanks to the large frame that embeds the shower enclosure in any type of environment, not necessarily that of the bathroom, and perfectly symbolises the passage of a hectic and stressful life to a universe dedicated to self-care: Frame is the gateway to a small multi-sensory microcosm created to enjoy intimate moments while immersed in colours, sounds and scents. The shower tray is made from Techstone®, the handle is made of glass for maximum cleanliness and transparency and 8mm full-length glass panels are equipped with the Crystal Clear® function.

Every Jacuzzi® Steam & Shower Cabin comes with 4 glass walls ensuring that the unit is sealed from the outside. The 2 glass walls against the wall in a corner situation offer a simple solution to tiling behind the Steam and Shower Cabin and is hygienic and easy to clean.

The subject of design

Beauty and wellness coexist in what is one of the most extraordinary creations by Jacuzzi® produced in limited edition. The unprecedented combination of teak, glass, steel and Techstone® has created a Steam & Shower Cabin which is like moving to another dimension. Whatever you are looking for, by entering the Omega Steam & Shower Cabin you will find it, you can relax, invigorate yourself, receive a boost of energy, release tension, wash away the tiredness.

The most beneficial of experiences

The Jacuzzi® vertical and back hydromassage involves the body throughout its entire height, stimulating all the muscle groups thanks to four directable Enerjet vertical jets. The steam generator allows you to get maximum performance from the steam bath that completes the shower moment with its purifying effect to which it is possible to combine the benefits of aromatherapy.

All the excitement of wellness

Omega allows you to choose three shower functions on the electronic control panel: pulsating, continuous and vaporised, all can be modulated in intensity according to the needs of the moment. In addition, by activating the cascade it is possible to receive a relaxing massage in the upper part of the neck and trunk. The Steam & Shower Cabin is available with either the seat on the right or with the seat on the left of the control panel and the shower.

Prestige in all the senses

Each shower is numbered and bears the signature of Pininfarina. The sinuous line of the seat is in perfect harmony with the innovative aesthetic lines of Omega which accommodates the body, making the shower a moment of complete comfort. The details are carefully researched, from the thermostatic mixer to the Crystal Clear system, to the function diverter: everything is the result of careful thought aimed at offering the most complete experience that you can have in a Steam & Shower Cabin.

Transparent design

Agile and gentle lines, large panels, high-quality materials, elegance and refinement: Essteam is the expression of a design that dedicates the art of minimalism to everyday life. The large glass screens are covered with Crystal Clear® to ensure maximum transparency even after use.

Functionality and avantgarde style

The anodised aluminium column contains the commands to activate the back hydromassage, the large raindrop shower head and the steam bath. The seat is made from Techstone®, as well as the shower tray which has been lowered almost to floor level. The temperature is kept constant by the thermostatic mixer which ensures the hydromassage is performed at the optimum temperature.

The essence of vitality

Enerjet is the system of adjustable water microjets created from Jacuzzi® technology: an unmatched source of energy and freshness. The nozzles are designed to target the various muscle groups and provide a pulsating massage.

Aquafeeling Effect

Intimacy, gentleness, relaxation, wellness: the exotic atmosphere of the Tropical Shower awakens the senses, caresses the skin and, in soft flowing streams, revives the spirit. Also the functions of steam bath and aromatherapy are available.

A new concept of bathtub

Jacuzzi® offers a range of models designed to be placed in the centre of the room, an oasis of relaxation in which to rediscover the rite of water. In line with the latest trends in interior design, these bathtubs become objects of design to be displayed even inside the bedroom. And the rest dedicated to the bathroom becomes a pleasant time to experience and share in the comfort of the living area.

A large cradle of water

All the freestanding Jacuzzi® baths have a generous internal capacity to accommodate the body completely and some are equipped with ergonomic backrests. These features allow you to enjoy an experience of complete abandonment by total immersion: a warm and welcoming embrace to release the tensions from a stressful day.

Classic: timeless style

Freestanding baths that have the romantic charm of a past era and, at the same time, offering all the comfort and innovation of a contemporary Jacuzzi® product. Thanks to their design that echoes the forms of the past, they fit perfectly in rooms decorated in a classic style. The double shell ensures perfect thermal insulation keeping water hot for a long time, while the legs in chrome plated iron reconfirm the current trend giving an elegant complement to your interior design.

Modern: an avant-garde design

Ideal for modern environments, furnished according to more contemporary styles. The lines are essential, the aesthetics minimalist and the organic and rounded forms recall natural elements. All the baths in the range have double acrylic shell constructed as a single piece so as to ensure a greater thermal insulation and guarantee a long, warm and welcoming embrace.

Self Paint

Alongside gloss white finish your bath can be supplied as a Self Paint option. That means that the exterior of the bath is sanded, primed and ready for you to add your own personal choice of colour.

Personalized colour choice

In order to have your bath in tune with your paint, wallpaper, curtains or blinds, you can choose from over 139 colour options and really put your personal stamp on your bathroom. Your bath will be cast in your Personal coloured Acrylic ensuring a deep colour and long lasting look.

To find out more about our range of colour options, talk to your nearest approved retailer.

infinito

freestanding
180 x 80 54/63,5h cm
design Carlo Urbinati

A cradle that wraps your body in the caress of water

It is born from the earth and opens up to the sky. Harmoniously in tune with the surrounding space. Minimal, a concentrated blend of contemporary lines and formal purity: a design which continues into infinity. All the senses are involved in wellness. Infinito was born from the design by Carlo Urbinati and Techstone®, a completely new concept, which lends itself to a multi-sensory experience of the time devoted to the bath. An exclusive concept that bears the Jacuzzi® signature. An essential bath, which is unexpected, but above all contemporary.

Prior to installing a Jacuzzi product always refer to the technical datasheets and instructions manuals available for download from www.jacuzzi.co.uk to ensure that you have the correct water pressure, electrical requirements and space needed to fully enjoy your purchase.

INFORMATION

Once you have chosen your bathroom you need to consider the practicalities. Many of our whirlpool baths and steam cabins are high performance items that have specific water pressure requirements between 1.5 and 2 bar. You may need a pump to increase your water pressure and in the case of steam cabinets, a 'negative head' style pump is maybe required. When mixing water and electricity in a bathroom it is important to seek professional advice with regards to current regulations. We specify for installation of our whirlpool baths hot and cold water supply of balanced pressures, standard 13amp mains using 2.5mm core cable, unless installing the Aura range with built-in heaters which require 20amp mains using 4mm core cable. We recommend that you visit your local Jacuzzi® Bathroom Specialist, who will not only assist with planning your bathroom, but will advise on all the practical requirements for your bathroom choice.

All prices are recommended retail including VAT at 20%. All dimensions are nominal and are given as an approximate size for guidance. Our policy is one of continual improvement and we reserve the right to change specification, colour and prices without prior notice.

The data and information given here are not binding for Jacuzzi, which reserves the right to make any modifications necessary without prior notice or replacements.
